Launch Your Own SecOps in a Day

Get your security data to work for you.

✔ **Collect Evidence, Not Noise**

Gain complete visibility into all enterprise services, record and analyze all security events and see what is important.

✔ **Augment Your Security Tools**

Gain complete visibility into all enterprise services, record and analyze all security events and see what is important.

✔ **Get Full Coverage**

Utilize our SecOps platform to get end-to-end coverage for your environment, including NDR, deception, cloud visibility and SOC automation.

✔ **Leverage our 24x7 SOC**

Partner with our team of cyber security experts for advanced threat hunting, incident response and digital forensics.

✔ **ThreatDefence SecOps Platform:**

- Next-Generation SIEM
- Integrated NDR
- Endpoint agents
- Multi-cloud visibility
- Vulnerability management
- Automation and playbooks
- Cyber risk management
- Threat intel
- Detection use cases
- Attack surface management
- Deception
- Automation and hunting.

Businesses now understand that to be secure they cannot rely on traditional SOC and MDR providers anymore. They are seeking to deploy internal, bespoke Security Operations capability, establishing control over their security data as well as implementing customized detection and response mechanisms. ThreatDefence SecOps Platform allows you to build your own, fit-for-purpose Security Operations capability, equipping your team with deep, forensic-like visibility, intelligent threat detection and automated response.

Everyone is being hacked despite spending millions on cyber security.

It seems like every vendor has a solution on how to protect your business. The promise is a simple and reliable cyber security. So why are organizations still getting breached?

The main reason is lack of visibility – most solutions in the market provide limited coverage, and at the same time operate as a black box – your security data is being sent somewhere to a cloud, however you can't ever see what is being collected and what is not.

Visibility + Evidence = SecOps

At ThreatDefence, we believe in giving you unrestricted access to your security data and providing comprehensive visibility across your entire IT stack. Our platform empowers you to establish an effective and sustainable Security Operations capability by transforming your data into actionable evidence. We work with you to integrate people, processes, and technology that align with your unique needs and budget, so you can confidently implement a capability that works for you.

ThreatDefence provides security teams with ready to use, end-to-end SecOps solution, including a full stack platform able to capture and correlate all types of security data, supported by Next-Generation SIEM, NDR, endpoint visibility, integrated threat intelligence, automation, SOC workflows and 24x7 team of cyber security experts.

Our cloud SecOps platform can be deployed in minutes, transforming your data into evidence, and detecting active and dormant threats in your environment. At the same time, it integrates with your existing security stack from day one. You can select your current security products from the list of hundreds of pre-built integrations and use our lightweight sensors across your on-prem and cloud environments.

threatdefence_

Fit-For-Purpose Security Operations

With ThreatDefence, you will not have any blind spots – all data can be operationalized and used for your analytics, hunting, detections and incident response. Equipped with our SecOps infrastructure tools and deep visibility, you can build and continuously evolve your own, customized Security Operations capability.

Endpoint Threat Detection and DFIR

ThreatDefence Agent enables you to quickly and easily get visibility across your endpoints, and activated advanced threat detection, response and forensics capabilities.

Multi-Cloud Support

Get visibility and threat detection across your O365, Azure, AWS and GCP environment, discovering threats, risks, vulnerabilities and misconfigurations within your cloud footprint.

NDR and Deception

Discover lateral movement and receive high fidelity alerts with our NDR sensors and deception toolset. Record every action taken by threat actors and react decisively.

Dark Web, Attack Surface management and more

Identify and analyze any security issues in your external perimeter in real time. Take proactive steps to mitigate risks before they are exploited by threat actors.

Automation and AI

Whether you need to minimize your response time, automate threat hunting or improve decision making - ThreatDefence have a solution for you.

Analyst Console

A powerful and intuitive interface for your security team to investigate advanced threats, respond to incidents and collect evidence.

Customer Portal

A feature-rich Customer Portal for risk-focused reporting, security posture monitoring and compliance management.

24x7 SOC

A global team of cyber security experts for ongoing monitoring, advanced threat hunting and incident response.

✔ **Deploy in Minutes**

- Easy deployment, 100% cloud-based platform
- Comes with numerous integrations to support your existing tech
- Supplied with threat intel, hundreds of detection use cases and playbooks.

✔ **Enterprise-Grade SecOps**

- Evidence-based security with NDR, endpoint DFIR, deception
- Next-Generation SIEM, integrated automation and Threat Hunting
- Cyber risk management with Dark Web, multi-cloud visibility, attack surface monitoring threat intel and more.

✔ **Evolving Cyber Security**

- All-inclusive pricing model
- Continuously updated behavior analytics and ML detections
- New SecOps features based on the community feedback.

ABOUT **THREAT**DEFENCE

ThreatDefence provides innovative Security Operations and cyber defense solutions to MSPs and Enterprises. Our SecOps Platform is designed to assist businesses of all sizes in implementing world-class detection and response, utilizing all available data sources, whether it be within their network, on the Dark Web, or concealed deep within their supply chain. We value open ecosystems and seamlessly integrate with any and all threat intelligence feeds and log sources, delivering immediate actionable security insights.
